

Md. Shamim Hossain

Full-Stack Developer (Next.js · TypeScript · Supabase)

shamimthedev@gmail.com · [linkedin.com/in/shamimthedev](https://www.linkedin.com/in/shamimthedev) · github.com/shamimthedev · shamimthedev.vercel.app

SUMMARY

Full-stack developer specializing in Next.js and TypeScript, with hands-on experience building production client platforms including a full-stack EdTech enrollment system and e-commerce solutions. Experienced in payment gateway integrations (bKash, PhonePe), database design (Supabase), CMS implementation (Sanity), and automated workflows (Telegram bots, Messenger tracking). Comfortable owning complete project lifecycles—from requirements and architecture to deployment, client management, and iterative feature releases.

EXPERIENCE

Founder & Full-Stack Developer

BebsharDost — Independent / Self-Employed
July 2025 – Present

- Built and delivered two production client platforms: a full-stack EdTech enrollment system and an e-commerce brand store
- Owned complete project lifecycle from requirements gathering to deployment, maintenance, and iterative feature releases
- Developed payment integrations (bKash PGW, Nagad, Rocket, PhonePe), admin dashboards, and CMS-driven content systems
- Implemented automated conversion funnels, real-time Telegram alerts, and Messenger lead tracking for client acquisition
- Managed client relationships, gathered feedback, and delivered solutions aligned with business goals and revenue growth

PROJECTS

biddaloy.com.bd — EdTech Platform for Kids

Tech: Next.js 15, TypeScript, Sanity CMS, Supabase, bKash PGW, Telegram Bot API

biddaloy.com.bd

- Built a complete EdTech ecosystem including public website, payment gateway integration, and admin dashboard
- Developed Messenger Conversion System: Facebook leads automatically land on dedicated enrollment pages with source tracking
- Integrated 5 payment methods (bKash automated PGW, Nagad, Rocket, Probashi bKash, PhonePe) for Bangladesh and India markets
- Implemented real-time Telegram alerts on every payment and Supabase database for enrollment tracking
- Platform supports 200+ active students across Bangladesh and India with automated payment processing

PROJECTS (CONTINUED)

amyra.com.bd — Power Tools E-Commerce Platform

Tech: Next.js 15, TypeScript, Sanity CMS, Tailwind CSS

[amyra.com.bd](#)

- Designed and developed a complete e-commerce platform for an authentic power tools business
- Integrated Sanity CMS for dynamic product catalog, category management, and content updates
- Implemented cart system, multiple payment options (bKash, Nagad, COD), and automated WhatsApp order notifications
- Deployed and currently maintain the live site with ongoing feature additions and performance improvements
